

Prefix gate ablation across copy models

HEFT-relative speedup versus modeled-copy reduction; exact gate-only ablation

ONE RUN
NO UNCERTAINTY

0.5× model (10.35 GB/s) 1× model (20.7 GB/s) 2× model (41.4 GB/s) Prefix gate Exact no-prefix - - - - same model

One-run diagnostic only: each point is one observation; no confidence interval or variance estimate.
